

Top Tip for  
Each Season

# PROVO GARAGE DOOR REPAIR

*Winter*

#1 tip is to remove all the ice that is freezing your garage door closed. You can do this by pouring hot water over it and shoveling it away.

*Spring*

#1 tip is to not procrastinate in getting the rust removed, this will only cause more damage and more headaches down the road.

*Summer*

#1 tip is to keep your garage door lubricated with high temperature lithium grease.

*Fall*

#1 tip- Broken springs are the most common problem, it doesn't make it the simplest. It is something that a professional should fix because of its intricacies and potential harm in trying to fix it yourself.
